

Transactions of the American Institute of Electrical Engineers Volume 30, pt. 3

Filesize: 8.38 MB

Reviews

I actually started off looking at this pdf. It is one of the most amazing pdf i have got read. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Milford Donnelly)

TRANSACTIONS OF THE AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS VOLUME 30, PT. 3

To get **Transactions of the American Institute of Electrical Engineers Volume 30, pt. 3** eBook, please follow the button listed below and save the document or gain access to other information which are in conjunction with TRANSACTIONS OF THE AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS VOLUME 30, PT. 3 book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 296 pages. Dimensions: 9.7in. x 7.4in. x 0.6in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 edition. Excerpt: . . . tension, but an approximate correction may easily be made for this. Problems connected with flexible transmission structures require the use of a curve between tension in span wire and deflection of support. This curve may be found for any given case from Mr. Thomas chart. Starting with normal tension and deflection and span length, the new tension and deflection, as supports approach each other by 0.1 per cent of span, for example, may be found approximately by obtaining from the curves the tension and deflection which would obtain on the original span but with a length of span wire 100.099.9 of the original. A correction may also be applied here for change in wire length due to change in tension. R. S. Brown: The calculation of the long transmission line may be simplified considerably by the use of the relation between inductance and capacity: where V is the velocity of light. This would be rigidly true were it not for the effect of the magnetic flux within the wire. In the actual case the approximation is very close if a reduced value of the velocity of light is used, (183,000 miles per second). Within the range of commercial sizes of nonmagnetic wire, the maximum error thus introduced in the value of capacity is one per cent. By the use of this relation one variable, line capacity, may be eliminated from the problem. The following symbols are used: P --the real power...
