

# The Urbanization Process in China and its Impact on the Environment

By Thomas Schneider

GRIN Verlag Nov 2015, 2015. Taschenbuch. Book Condition: Neu. 211x149x4 mm. Neuware - Seminar paper from the year 2015 in the subject Asian studies, grade: 1.0, University of Duisburg-Essen (Institut für Ostasienwissenschaften), language: English, abstract: This paper reviews the urbanization process in China during the past decades and gives a prospect for the near future. It is shown, that in a remarkably short period, China increased its urban population to more than 50 percent of the entire population. This rapid urbanization was mainly driven by rural-urban migration in the course of the industrialization process and by the in situ urbanization, as a mainly government related factor. The paper afterwards identifies energy and resources, pollution and land consumption as the major areas where by urbanization caused challenges need to be tackled. 20 pp. Englisch.

## Reviews

*The ideal ebook i possibly study. Better then never, though i am quite late in start reading this one. It is extremely difficult to leave it before concluding, once you begin to read the book.*
